Mobile: +919563777346 | **Email**: priyashbarman9@gmail.com | Linkedin | Portfolio

Summary

Full Stack Developer with **2.10 years +** of experience designing and building scalable web applications. Proficient in **Nest.js, Next.js, FastAPI, MongoDB** and **PostgreSQL** with strong expertise in both JavaScript/TypeScript and Python ecosystems. Passionate about delivering end-to-end solutions, optimizing database performance, and writing clean, maintainable code. Adept at collaborating in Agile environments and translating business requirements into technical solutions.

Technical Skills

- **Backend:** Nest.js, FastAPI, Node.js/Express.js
- **Frontend:** Next.js, React.js, TanStack Query, Zod/Yup, Redux/Zustand, JavaScript/TypeScript
- **Databases:** MongoDB, PostgreSQL, Database Optimization
- **Languages:** Python, TypeScript/JavaScript, C/C++
- **Tools & Cloud:** Git, Docker, Postman, Swagger, Kafka, Redis, AWS (EC2, S3), Azure Blob
- **AI & Integrations:** RAG, Vector Search, Prompt Engineering, Fine Tuning, Langchain/Langgraph, ETL
- **Practices:** Agile/Scrum, Low Level Design (LLD), RESTful APIs, Socket.IO/Websocket

Experience (2.10 Years +)

Webskitters Technology Solutions Pvt. Ltd. | Full Stack Developer – Full Time | July 2025 – Present

- Building full-stack applications with **Nest.js (backend)** and **Next.js (frontend)** using **MongoDB/PostgreSQL**; developing RESTful APIs with **FastAPI** and **Node.js/TypeScript.**
- Exposing AI capabilities via **FastAPI backend services** consumed by Next.js frontends.
- Implemented **Redis caching** reducing database load and improving API response times.
- Collaborating in Agile sprints to deliver features with zero critical bugs.

0101 Digit All Solutions Pvt. Ltd. | Full Stack Developer – Full Time | ***December 2023 – July 2025***

- Designed, developed, and maintained scalable RESTful APIs using **Node.js, Django**, **FastAPI with TypeScript**; integrated APIs into responsive frontends using **Next.js** for seamless full-stack functionality.
- Built real-time features using Kafka and WebSocket for live data streaming and instant updates
- Built AI chatbot using Langchain/Langgraph with Gemini/Ollama LLMs; implemented RAG architecture with vector search; created ETL pipelines for financial data processing.

Seap Infotech | Dotnet Developer - Internship | August 2023 – November 2023

- Developed and maintained backend services using .NET Core and Microsoft SQL Server.
- Assisted in debugging and performance optimization for enterprise applications.
- Created technical documentation for seamless handover of projects.

Projects

- **Inertia Trade –** Real-time forex trading suggestion platform with historical analysis, Stripe checkout, subscription management, and webhook handling for automated billing workflows. [Django, Next.js, PostgreSQL, Kafka, WebSocket, Stripe]
- **Finsafe Chatbot** – AI-powered financial assistant with vector search, RAG, fine-tuning, and ChromaDB for semantic retrieval and context-aware responses. [FastAPI, Next.js, Langchain, Langgraph, LLMs]
- **Finsafe** – Financial advisory platform with investment tools, financial calculators & webinars [NodeJS, ExpressJS, Next.js, MongoDB]
- **MyGopalan** – Cattle management system with modules for tasks, inventory and e-commerce [MERN]
- **121Captions** – Inclusive CRM, chat, task management, RBAC [.NET Core, ReactJS, PostgreSQL, LINQ]

Education

Bachelor of Computer Applications (BCA) - *IGNOU*
June 2020 – June 2023
